Journal of Fluid Mechanics **Volume 374 10 November 1998**

U. Kânoğlu & C. E. Synolakis Long wave runup on piecewise linear topographies *page* 1

R. A. Antonia, T. Zhou & Y. Zhu Three-component vorticity measurements in a turbulent grid flow 29

T. Sjögren & A. V. Johansson Measurement and modelling of homogeneous axisymmetric turbulence 59

I. P. Castro & E. Epik Boundary layer development after a separated region 91

D. Benielli & J. Sommeria Excitation and breaking of internal gravity waves by parametric instability 117

D. Henry & M. Buffat Two- and three-dimensional numerical simulations of the transition to oscillatory convection in low-Prandtl-number fluids 145

B. Yan & N. Riley Viscous flow about a submerged circular cylinder induced by free-surface travelling waves 173

C. G. Phillips & S. R. Kaye Approximate solutions for developing shear dispersion with exchange between phases 195

F. Marqués, J. Sánchez & P. D. Weidman Generalized Couette–Poiseuille flow with boundary mass transfer 221

D. Das & J. H. Arakeri Transition of unsteady velocity profiles with reverse flow 251

D. W. Moore & D. I. Pullin On steady compressible flows with compact vorticity; the compressible Hill's spherical vortex 285

X. Huang & M. García A Herschel–Bulkley model for mud flow down a slope 305

L. Li, J. D. A. Walker, R. I. Bowles & F. T. Smith Short-scale break-up in unsteady interactive layers: local development of normal pressure gradients and vortex wind-up 335

Y. Na & P. Moin Direct numerical simulation of a separated turbulent boundary layer 379

P. K. Stansby, A. Chegini & T. C. D. Barnes The initial stages of dam-break flow 407
